Student Reflection
Research and Hearing Process

Complete after the day of the Congressional hearing in which you have participated in research for your assigned section, presented at a hearing, and observed fellow students presentations.

1. What did you learn from the activity?

2. Which parts of the activity were most interesting to you?

3. Which parts of the activity were difficult for you?

4. If you could do it again, what would you do differently?

5. Did any issues arise during the hearing about which you have strong opinions? If so, in what ways could you make your ideas known to others?
